LO: Reflecting Lights

Circle the objects that are light sources

Explanation video: https://www.youtube.com/watch?v=skGmQC87Bvg

Look around your house and find some different objects. Are the objects reflective?

To test if an object is reflective you can check to if you can see your reflection or whether the objects reflect light back out with a torch.

Draw and complete the table in your book.

Object and location….	I can see my face…	It reflects torch light
